

Traffic Portal Swarm

SEO linkomatic technique

You have about 20 Traffic Portals, that each allow 5 links with their linkomatic features. You can utilize these portals to build greater back linking in your SEO campaign. The following is a general illustration to help you understand how this is done.

Each Traffic Portal comes with the Linkomatic link tool. A total of 5 links per Traffic Portal.

The YELLOW box is the main site your SEO campaign is set to get to the top of a search query.

The RED arrows are the links each Traffic Portal points to the main objective web site.

The BLACK arrows are the daisy chain each Traffic Portal links to the next Traffic Portal.

The remaining 3 links of each Traffic Portal should be used to link to outside services that will link to your Traffic Portal if you link to theirs. NOTE: Use the Veretracking tool to assure they are sending traffic to you.

NOTE: Make sure your links use the keywords in the link.

This illustration does not represent all the Traffic Portals available to you as a Veretek subscriber.
